School's Considerations:Class arrangement

- Students taking 3 electives are grouped into one class.
- Students taking 2 electives are assigned to the other 4 classes. The unallocated lessons resulting from the absence of the third elective are assigned for the core subjects, which are, for technical expediency, designated as 'school-based subjects'. In short, students taking 2 electives will have more lessons for Chinese Language, English Language, Mathematics and Liberal Studies.

Class Size

- The class sizes of elective subjects and school-based subject are limited to 30 and 40 respectively.

Allocation strategies

- A school-based subject with 4 groups is created. All students taking 2 electives are assigned to the school-based subject as their first priority.
- The top 40 students taking 3 electives are allocated to their first options with ‘Choice 1’. The remaining students are then allocated with ‘Choice 1’.
