School's Considerations:Catering for students' needs

- Students can take 2 or 3 electives according to their interest and abilities.
- Subjects with different MOI are arranged in the same block such as Economics and 經濟 are arranged in Block 3. This is to facilitate students who want to change from different groups of

the same subject.

Arrangement of lessons for students taking 2 electives

- Enhancement Programme will be arranged for students studying only two elective subjects at S4. The S4 Enhancement Programme is made up of 3 special lessons of English Language, and 2 special lessons of Liberal Studies.
- Instead of having free periods, students will take an Enhancement Programme arranged in each elective block at S4.

Group size

- Class size of all subjects is limited to 40 except ICT is 21.

Class teacher

- Two teachers are assigned as class teacher for each class.

Timetabling tools

- The school will continue to use TESS to generate time-tables for the next academic year while Timetabling Module of WebSAMS will also be used on a trial basis.
